2. Any documents mentioning the discharges or spills of drilling muds or any other pollutants at any locations related to the pipeline's construction, including observations, reports and sampling results of waters and/or soils/sediments, including but not limited to the break-outs of drilling muds during directional drilling of Middle and Cherry Creeks, the Coquille River, and/or discharges of excavated soils into the drainage area of Cherry Creek.
3. Any documents describing the project's compliance or non-compliance with BPA Right of Way requirements.
4. Any documents in any form describing BPA's permission to the owner and their contractor to perform in-stream work until September 15, and any documents or correspondence describing any decisions or discussions to extend the date for the in-stream work.
